About

Software Engineer with hands-on experience building full-stack web and Mobile applications, internal business systems, AI-integrated tools, and cross-platform products using JavaScript, TypeScript, React, React/Native, Node.js, and MongoDB. Experienced in designing scalable frontend architectures, backend systems, admin platforms, real-time applications, and workflow-driven software focused on performance, maintainability, and practical business use cases.

Work Experience

Full Stack Developer Jan 2026 - Apr 2026

Soby Agro Machinery | Daska, Pakistan

- Developed an internal MERN-stack inventory and order management system to automate manual stock tracking and operational workflows
- Implemented a QR-based inventory workflow for machinery and inventory batches, enabling faster stock movement tracking and checkout handling
- Built responsive admin dashboards, sales summaries, stock alerts, and activity monitoring interfaces to improve inventory visibility and reporting

Full Stack Developer Sep 2025 - Dec 2025

Systems Limited | Karachi, Pakistan

- Developed reusable React components based on pixel-perfect Figma designs, ensuring responsive UI and cross-browser compatibility across the application
- Optimized React rendering patterns reducing unnecessary re-renders and improving frontend performance and load times
- Collaborated in Agile sprint cycles with backend engineers and product teams to deliver production features

Full Stack Developer Apr 2025 - Jun 2025

Fabulous Technology Solutions | Sialkot, Pakistan

- Worked as a full-stack MERN developer delivering production features across React, Node.js, Express, and MongoDB
- Designed and implemented scalable REST APIs, handling authentication, authorization, and business logic
- Built and optimized React-based dashboards and workflows, focusing on performance and maintainable architecture

Bidder Dec 2022 - Sep 2023

Karigar Web Solutions | Sialkot, Punjab

- Wrote compelling and customized project proposals to increase client engagement and win rate
- Maintained records of bids, follow-ups, and client interactions for future reference
- Stayed updated with platform trends and client preferences to optimize bidding strategies

Projects

Echo-Mind

Built an AI-native Next.js application leveraging Claude and LangChain for LLM orchestration, RAG pipelines, and long-term memory using pgvector

- A Next.js full-stack application with LLM integration using LangChain
- Implemented RAG with pgvector for document-based answers and long-term memory
- Built scalable backend using TypeScript, Prisma, and PostgreSQL

DreamSpace - AR-Enhanced Interior Designs (Mobile + Admin Panel)

An AR-enabled multi-vendor e-commerce platform

- Engineered a cross-platform commerce platform with a React Native mobile application and React admin dashboard
- Implemented complex client-side state flows for product browsing, cart management, and checkout interactions
- Developed interactive UI systems including AR product visualization and dynamic product filtering
- Designed REST APIs supporting authentication, product management, and analytics dashboards

DesignFlow

Figma-to-React Agentic Pipeline Agentic workflow that autonomously converts Figma designs into production-ready React code using a 4-agent pipeline

- Built a multi-agent system (Planner, Asset, Coder, Reviewer) using Claude Code with persistent agent memory and inter-agent handoffs
- Integrated Figma MCP server to autonomously extract design data, download assets, and generate TypeScript + TailwindCSS components
- Implemented strict code quality enforcement via a Reviewer agent that audits plan compliance, React best practices, and redundancy violations

Pingly

Real-Time Cross-Platform Chat System

- Built a full-stack real-time chat app with React (web), React Native (mobile), and Node.js
- Implemented Socket.IO for real-time messaging, typing indicators, and presence tracking
- Used TanStack Query and Zustand for optimistic updates and consistent client state

Core Skills

Frontend: React.js, Next.js, Typescript, Redux Toolkit, Zustand, Tailwind CSS

Backend: Python, Node.js, Express.js, Prisma, REST APIs, MongoDB, PostgreSQL

Cloud & Storage: AWS S3, CI/CD

Tools: Git, Github, Docker, Postman, Figma, Winston

AI Tools: Agentic Workflows, MCP Servers, Cursor, Claude Code, Github Copilot

Education

University of Sialkot – Sialkot, Pakistan Dec 2021 – Aug 2025

Bachelor of Science in Computer Science

CGPA: 3.76/4.0
